

Readmissions Impact Wellbeing As Well As Finances

Patient readmissions can negatively impact not only patients but also hospitals, which can be penalized with severe penalties under the Hospital Readmissions Reduction Program.

Begin Implementing Effective Readmission Reduction

Service to Reduce Hospital Readmission

Visit our site and reach out to our organization for an initial discussion on the most effective plan for your facility to reduce patient readmissions.

virtualhealthdesk.com/eDoc

Our highly qualified team of physicians, along with our unique technology suite, assists Hospitals and ACO's to drastically reduce Hospital Readmissions and avoid penalties.

Solving Readmissions Through Personalized Patient Engagement

Our eDoc service has been carefully designed around solving a real and specific problem: Drastically reducing hospital readmissions through Remote Patient Monitoring and Tele-Health care coordination.

How Do We Do It?

- We rely on a highly-trained team of qualified physicians on staff, providing remote patient care.
- Our advanced technology capabilities allow us to integrate with hospitals and other healthcare facilities, seamlessly sharing data both ways.
- Our advanced Telehealth capabilities allow us to adapt quickly under changing patient circumstances, offering better patient care, and allowing hospitals, ACO's and IPA's to focus on what they do best.

eDoc's Advantages to Reduce Readmissions

Our eDoc solution brings forth a unique set of staff and technological support mechanisms to take on patient monitoring and tele-health care coordination from the moment they are discharged.

hospitals and ACO's to generate more revenue through improved beneficiary outcomes and reduced instances of avoidable care issues, which in turn increase quality scores and reduce penalties due to patient readmissions.

Historically, hospitals have been receiving severe financial penalties if their observed readmissions exceeded a set national standard. Our eDoc service is both a proactive and remedial method to ensure hospitals and ACO's protect their precious reimbursement funds.

Our Unique eDoc Features Include:

Our eDoc solution brings forth a unique set of staff and technological support mechanisms to take on patient monitoring and tele-health care coordination from the moment they are discharged.

Staff Advantages:

Service-Driven

Services tailored around executing an effective readmissions reduction plan.

Physician Access

Physicians are available on-demand around the clock – through our 24/7 call-center – to attend pressing patient needs and care follow-through.

Telehealth

Management of disease treatment and medication through advanced Telehealth protocols.

Care Coordination

Follow up on post-discharge care through patient care coordination.

Technology Advantages:

Supported By A.I.

Our tools are backed by Artificial Intelligence for predictive analysis and other benefits brought to life by machine learning.

Risk Management

Risk-adjustment/stratification instruments to identify patients for effective care coordination.

Engagement

Patient engagement tools allow for close interaction with care coordination staff.

Data Access

Access to longitudinal health records, along with precise evaluation based on historical trends.
